

US Export Controls Classification Information

RIM products provide encryption features that are subject to the U.S. Export Administration Regulations ("EAR") and other U.S. laws when in or exported from the United States. The EAR classifications of RIM products that have been reviewed by the U.S. Bureau of Industry and Security are set out in the chart below.

All of the BlackBerry software and hardware covered by the chart may be exported under the EAR to most destinations with No License Required ("NLR"). However, these items may not be exported and re-exported to certain countries (currently Cuba, Iran, North Korea, Sudan and Syria) or to persons or entities prohibited from receiving U.S. exports, including those (a) on the Bureau of Industry and Security Denied Parties List or Entity List, (b) on the Office of Foreign Assets Control list of Specially Designated Nationals and Blocked Persons, and (c) involved with missile technology, nuclear, chemical or biological weapons, or military end-uses where prohibited by an applicable arms embargo.

For further details on export restrictions applicable to ECCN 5D992.a and 5D992.b.1 products, please refer to the EAR. **The information on this page is not legal advice, and you are recommended to seek your own legal advice as appropriate.**

Product	ECCN ¹	CCATS
BlackBerry® Device ²	5A992.a	G064903
BlackBerry Device Software, BlackBerry® Connect™ software, BlackBerry® Built-In™ software (version 4.6 and earlier) ²	5D992.b.1	G064903
BlackBerry® Desktop Software, BlackBerry® Desktop Redirector Software (version 4.6 and earlier)	5D992.b.1	G064903
BlackBerry® Enterprise Server (version 4.2 and earlier)	5D992.b.1	G053842
S/MIME Support Package (version 4.2 and earlier)	5D992.b.1	G053841
PGP® Support Package (version 4.2 and earlier)	5D992.b.1	G053841
BlackBerry® Smart Card Reader	5A992.a	G052270
BlackBerry Smart Card Reader software (version 1.5 and earlier)	5D992.b.1	G052270

¹ All of the ECCNs are based upon BIS review as "mass market" encryption products.

² Please note that RIM has obtained separate classifications for the BlackBerry Device hardware and the BlackBerry Handheld Software that runs on it, under the same CCATS document.
