

System Requirements for BlackBerry Enterprise Server v4.1 for Microsoft Exchange

Minimum required hardware and configuration:

- For 500 users: Intel® Pentium® IV processor (2GHz or greater), 1.5 GB RAM, MSDE 2000 on the same computer
- For 1000 users: Intel Pentium IV dual processor (2GHz or greater), 2GB RAM, MSDE 2000 on the same computer
- For 2000 users: Intel Pentium IV dual processor (2.8GHz or greater), 4GB RAM, MSDE 2000 on the same computer

Note: For systems running over 1000 users, the recommendation is to deploy Microsoft® SQL on a separate server. This reduces the memory requirement on the BlackBerry® Enterprise Server.

- Windows® 2000 Server (Server or Advanced Server Editions) or Windows Server® 2003
- Integrates with Microsoft Exchange 5.5 (Service Pack 4 or later), Microsoft Exchange 2000 (Service Pack 2 or later), Microsoft Exchange 2003 mail server environments (mixed or native modes) or Microsoft Exchange 2007 mail server environment (interop or native modes)
- Microsoft Exchange 5.5 Administrator, Microsoft Exchange 2000 System Manager, Microsoft Exchange 2003 System Manager or Microsoft Exchange Server MAPI Client and Collaboration Data Objects 1.2.1 for Microsoft Exchange 2007
- Microsoft Internet Explorer® version 6.0 or later

Note: Certain features require a minimum version of BlackBerry software.
