

Founded in 2001 and quickly established as the leader in mobile emergency response and business continuity, **Wallace Wireless** provides emergency class systems for everyday use. Our merger in November 2006 with leading wireless company mBiztech Corp resulted in the launch of the largest suite of ready-to-use, and easy-to-deploy wireless enterprise applications on the market.

Our offices are located in the United States and Canada, and we partner with leading technology, carrier, and resellers globally. We ignite the mobile enterprise for the Financial Services, Fortune 1000, Legal, Public Sector, Public Safety, Telecom, Utilities and Education sectors.

## Wallace Information Communicator

*Wallace Information Communicator (WIC) provides wireless access to the people and data that keep you effective*

Whether you're managing events during a crisis or responding to the challenges of everyday life on campus, getting relevant information to the right people quickly and easily enables them to make the right decisions.

WIC for Education equips K-12 and universities with a wireless solution for both crisis and attendance management, providing access to critical contact and facilities information at all times. It includes an easy to use module enabling text communication between faculty, students, and parents during an event.

- Manage contacts easily, assured that the most current data is always on your BlackBerry® smartphone.
- Enable communication from one to many with simultaneous messaging to IM, PIN, email, SMS and phone - all in one solution.
- Stay informed, with the ability to view crisis management documents – virtually whenever, wherever.
