

Free mobile productivity and learning tools for BlackBerry® smartphones

gWhiz is a suite of mobile productivity and learning tools that provide on-the-go planning, learning, fun, and collaboration. gWhiz tools are designed for professionals and students of all ages. Headquartered in Annapolis, Maryland, gWhiz LLC is focused on developing affordable educational software for a lifetime of learning. We believe that contemporary smartphone technology provides a unique opportunity to offer powerful, entertaining, on-the-go learning and collaboration tools.

got-2

Things you need to do.

If you prefer crossing items off your list versus constantly checking your calendar, then our new got-2 Task Manager is for you. Not only does it synchronize nicely with the BlackBerry task list and calendar, got-2 also has a sophisticated reminder system that will alert you by a given date/time or a GPS location.

gFlash+

Test your knowledge.

Learn anything from chemistry to ancient history, study for a professional certification, or take a minute to relax and enjoy some trivia, anywhere and anytime. The application, flashcards, and trivia content can be easily downloaded to your BlackBerry smartphone and used in multiple learning modes.

gCalc!

Graph virtually anywhere, anytime.

Unlike traditional, simplistic phone-based calculators, gCalc! supports graphing and unit conversions and provides extensive support for dozens of sophisticated mathematical functions and constants. It boasts professional graphics with the ability to zoom, scroll on and email the results.

gRef

Information you need, every place you need it!

gRef provides fast mobile access to your very own personalized reference library. gRef holds your complete collection of academic, professional, and personal information. You can select gRef libraries from the gWhiz catalog or easily create new ones. You can even email your individual 'cheat sheets' to your friends.
